

23. (New) The ink receiving medium according to claim 22 wherein the pigment management system comprises water-soluble multivalent metal salt.

~~24. (New) The ink receiving medium according to claim 22 wherein the fluid management system comprises surfactant.~~

25. (New) The ink receiving medium according to claim 22 wherein the macroporous substrate has an average pore size of from about 3 micrometers to about 5 millimeters.

26. (New) The ink receiving medium according to claim 24 wherein said surfactant is non-ionic, cationic, anionic, or a combination of anionic and non-ionic surfactants.

27. (New) The ink receiving medium according to claim 24 wherein said surfactant is selected from fluorochemical, silicone and hydrocarbon based surfactants, and combinations thereof.

~~28. (New) The ink receiving medium according to claim 23 wherein the pigment management system further comprises an opacifying pigment.~~

29. (New) The ink receiving medium according to claim 23 wherein said water-soluble multivalent metal salt is aluminum sulfate, aluminum nitrate, gallium nitrate, ferrous sulfate, chromium sulfate, zirconium sulfate, magnesium sulfophthalate, copper sulfophthalate, zirconium sulfophthalate, zirconium phthalate, zinc sulfate, zinc acetate, zinc chloride, calcium chloride, calcium bromide, magnesium sulfate, magnesium chloride, aluminum sulfophthalate, aluminum sulfoisophthalate, or combinations thereof.

~~30. (New) The ink receiving medium according to claim 22 wherein the fluid management system comprises surfactant and the surfactant is a hydrocarbon based anionic surfactant.~~
